

# Universal FRP Tanks

Universal FRP tanks are generally available in original and blue colors; It comes in a full range of sizes with a diameter of 6"-80" and a height of 10"-79"; It is both NSF and CE certified. Both colors and models can be customized upon request.

Universal FRP tanks are provided with an upper opening and a lower opening to facilitate medium loading and unloading.

Notes: 8079-6"-6" universal FRP tank cannot operate at 150 PSI.

# FRP Tanks with Upper Loading / Lower Discharge Port

FRP tanks with upper loading / lower discharge port are generally available in original and blue colors. It comes in a broad range of sizes with a diameter of 30"– 80" and a height of 65"–79"; It is both NSF and CE certified. Both colors and models can be customized upon request.

It is provided with a positive and negative pressure protection device to make the pressure more stable and extend the lifespan of the tank; When loading and unloading filter materials, you do not need to open the upper and lower openings, and just load and unload filter materials from side ports, thus reducing the damage to valves and water distributors.

Notes: 8079-6"-6" FRP tanks with upper lower discharge port cannot operate at 150 PSI.

# PE Filler for Softener Tank

PE filler for softener tank is a kind of white funnel made of food grade PE raw material that have excellent corrosion resistance. It is designed into funnels with a large diameter and thickened walls. Besides, its smooth inner surface helps filling material moving into the FRP softener tanks easily without clogging the center pipe of the FRP vessel or causing filling material run-off. It is widely used in water treatment, wastewater treatment, etc.

## Specifications
